PB Series Pressbrakes

- Estun NC-E21 programmable digital control stores up to 40 unique programs with 25 automatic progressive bending steps in each individual program, assuring production accuracy & repeatability every time
- Estun NC-E21 programmable hardened ballscrew backgauge system with adjustable height finger stops
- Segmented heavy duty 86° offset top punch is segmented for return bend clearance (Segmented 35° top punch on PB-40A & PB-70B)
- Multi-vee bottom die is made from one solid die block design to handle heavy plate, safety edge vee is incorporated in bottom die block
- Adjustable sliding blocks control the machines beam to provide desirable open height distance to the (slow speed) mute bending point. Operator adjustable locking knobs for quick adjustment, enables accurate repeatability and increased productivity
- Hydraulic MPA pressure gauge mounted on right side of support frame with quick adjusting pressure control knob
- Reinforced side frames providing additional support strength to machine throat
- LED lighting

FoldSafe Safety Guarding System

FoldSafe Advantages

- Australian made genuine FoldSafe Safety Guarding System, manufactured & fitted in Australia.
- The safest integrated dual redundant curtain system in Australia.
- 100% Australian design, built and supported locally.
- Dual e/stops safety gate circuits for maximum operator safety.
- Encoder speed & stopping performance monitoring will ensure maximum safety in the rare case of hydraulic valve failure.
- Italian made safety curtains & safety relays with a long protection height of 910mm @10ms.
- Primary & secondary stop method design, if the primary stop detection fails, the secondary stop is still active monitoring machine ensuring maximum safety.
- User friendly interface displaying status of machine, no guess work or codes.

Pressbrakes require safety guarding for OHS compliance

Fully enclosed cutting head
Fully enclosed cutting head offers protection to key components against the harsh cutting environment.

Engraving tool

The Swift-Cut engraving tool allows you to mark and cut in one operation, meaning no more outsourcing or moving your project from one machine to another (optional extra).

Automatic height control

Automatic torch height control maintains the correct cutting height resulting in improved cut quality and consumable life.

Software
Swift-Cut's easy to use one-piece software

Operators console
Ergonomic operators console with touch screen & keyboard/mouse inputs.

Laser aid

Laser cross hairs aid in the positioning of the cutting head.

Plate sensor

Pneumatically driven "Soft Sense" soft touch plate sensor accurately locates the plate surface even on thin materials.

Water table bed

The water table bed option offers efficient fume suppression so that no external fume extraction is required. Alternatively, the zoned downdraft table option (only available in the 3000mm machine size) captures fumes and particles from beneath the cutting area.

Gantry beam

Lightweight but rigid gantry beam supports twin x-axis linear rails, it also gives you the ability to cut 100mm box sections.

CE Certified

COMPLETE SYSTEM FROM
\$29,850 ex GST
\$32,835 inc GST

Heavy duty base
Heavy duty base redesigned from the ground up provides support and rigidity.

Linear rail

Precision linear rail on all axes combined with hybrid servo motor encoder feedback delivers exceptional positioning accuracy.

Enclosed drag chains

Fully enclosed drag chains protect cables against damage from molten material.

Heavy duty gantry

Heavy duty gantry end castings with machined faces provide a precise & stable platform for the cutting head.
