Software
Swift-Cut's easy to use one-piece software

Operators console
Ergonomic operators console with touch screen & keyboard/mouse inputs.

Engraving tool
The Swift-Cut engraving tool allows you to mark and cut in one operation, meaning no more outsourcing or moving your project from one machine to another (optional extra).

Laser aid
Laser cross hairs aid in the positioning of the cutting head.

Water table bed
The water table bed option offers efficient fume suppression so that no external fume extraction is required. Alternatively, the zoned downdraft table option (only available in the 3000mm machine size) captures fumes and particles from beneath the cutting area.

Heavy duty base
Heavy duty base redesigned from the ground up provides support and rigidity.

Fully enclosed cutting head
Fully enclosed cutting head offers protection to key components against the harsh cutting environment.

Automatic height control
Automatic torch height control maintains the correct cutting height resulting in improved cut quality and consumable life.

Plate sensor
Pneumatically driven "Soft Sense" soft touch plate sensor accurately locates the plate surface even on thin materials.

Gantry beam
Lightweight but rigid gantry beam supports twin x-axis linear rails, it also gives you the ability to cut 100mm box sections.

Heavy duty gantry
Heavy duty gantry end castings with machined faces provide a precise & stable platform for the cutting head.

Enclosed drag chains
Fully enclosed drag chains protect cables against damage from molten material.

Linear rail
Precision linear rail on all axes combined with hybrid servo motor encoder feedback delivers exceptional positioning accuracy.
