*Pilot Air Compressors, family
owned and proudly Australian.*

We understand that in some situations, a standard air compressor that is bought off the shelf may not be the optimal solution for every application. Our unique custom build service is the perfect solution.

We have a team of technical experts who work with clients to assess their needs, provide advice and design fully customised compressed air systems. At our manufacturing plant in Silverwater, NSW, we have a dedicated team of highly skilled technicians who build customised solutions for our clients. We can also assist in installation.

SPECIALISED PRODUCTS

K17/DUPLEX/2.2KW

- 557.4 L/Min (19.7 CFM) FAD (measured to AS4637)
- 2 x 2.2KW motor and pump combination
- 1,000 kPa (145 PSI) maximum cut out pressure
- Twin cylinder compressor pumps, made in Italy
- 147 litre receiver (to AS1210)
- 2 x 240V 15AMP supply required
- Specially designed to suit applications where no three phase power is available
- Dimensions: 1500mm(L) x 600mm(W) x 950mm(H)
- Weight: 150kg
- 3 year pump warranty, 1 year on all other components

K17PUTE

- 308 L/Min (10.9 CFM) FAD (measured to AS4637)
- 1,000 kPa (145 PSI) maximum cut out pressure
- Twin cylinder compressor pump, made in Italy
- HONDA recoil start GX160 petrol engine
- 45 litre air receiver (to AS1210)
- Specially designed to fit in utes
- Dimensions: 745mm(L) x 710mm(W) x 500mm(H)
- Weight: 70kg
- 3 year pump & engine warranty, 1 year on all other components
