DCC-310 Dust & Cyclone Collector Package

FC-10

DC-3

DC-3: Dust and shavings of LPHV extractors are sucked through the impeller fan blade and then the waste falls into the lower bag, the air being exhausted through the top filter bag, collecting some of the fine dust on the way.

CDS-2/3: Cyclone separator main advantages is the ability to extract and hold large particles and chips before they reach the dust collector impellers resulting in no more loss of suction from blocked filters.

Includes:

- DC-3 Dust collector (W394)
- FC-10 Filter cartridge (W328)
- CDS-2/3 Cyclone filter (W316)
- DCK-2 Dust acc. kit (W344)
