## Axis drive system

High-precision Travel System

High rigidity and precision of the X,Y,Z axis drive systems are achieved by using roller type linear guideways and highly rigid couplings. Speed and accuracy are further enhanced with the nut cooling system which minimizes thermal error of ball screws.
(Nut cooling system : Only DNM 350/5AX)

High Rigid Roller-type linear guideway
Rigidity and accuracy of feed system are improved with roller type linear guideway and coupling.
