EXPERIENCE THE HAFCO INDUSTRIAL WIPER DIFFERENCE

ARMOR DRY WIPES

Move beyond the unpredictability of shop rags and upgrade to a consistent, high-performance cleaning solution with HAFCO Armor Dry Wipes.

SHOP RAGS

Inconsistent Quality
Shop rags vary significantly in size, material, and cleanliness. They can contain contaminants such as buttons, zips, or residual chemical screening risk and inconsistency in every use.

Bulky & Inefficient Storage
Loose rags take up excessive space, creating cluttered and disorganised work environments.

Inefficient Work Practices
Constant back-and-forth trips to the storage area are necessary due to the lack of portability and heavy weight of shop rags.

Increased Waste
Not all rags are usable, leading to more waste ending up in landfills and making disposal a bulky and challenging task.

Hygiene & Contamination
Reused rags can harbour bacteria, oils, and contaminants, increasing the risk of cross-contamination in the workplace.

High Lint Residue
Mixed-fabric rags often leave lint behind, compromising cleaning quality—especially in precision tasks.

Inconsistent Absorbency
Rag performance varies depending on fabric type and condition, leading to inefficient cleaning.

Armor Dry Wipes

Consistent Performance
HAFCO Amor Wipes are manufactured to exact specifications, delivering uniform size, material, and performance every time ensuring reliability across all cleaning tasks.

Compact & Efficient Storage
Amor Wipes are neatly packaged in boxes or rolls, reducing storage footprint and improving workspace efficiency

Boost Worker Efficiency
Our portable wipes are lightweight and easy to carry around, eliminating the need for constant trips to the storage area and streamlining your cleaning process.

Reduced Waste
With every wipe being 100% reusable, there's no need to worry about unused rags or wipes needlessly contributing to landfill waste.

Cleaner & Safer Solution
HAFCO Amor Wipes are designed for single-use or controlled reuse, helping maintain higher hygiene standards and a safer work environment.

Low Lint Performance Risks
Amor Wipes are engineered to minimise lint, delivering a cleaner finish for both general and detailed applications.

Superior Absorbency
HAFCO Amor Wipes offer excellent water and oil absorbency, delivering fast, effective results across demanding applications.
