

Swift-Cut

AUTOMATION

WITH THREE MACHINE SIZES, & MULTIPLE PLASMA POWER SOURCES
WE CAN MATCH A MACHINE TO YOUR PRODUCTION REQUIREMENTS

IDEAL FOR WORKSHOPS, METAL FABRICATORS, REPAIR OUTFITS,
EDUCATIONAL ESTABLISHMENTS, DESIGNERS AND ARTISTS

- ✔ *Swift-Cut is No.1 in class*
- ✔ *Affordable in-house metal cutting*
- ✔ *Supreme cut quality without compromise*
- ✔ *Out-performs many expensive alternatives*
- ✔ *Design and built in the UK*

CE Certified

Soft Sense Torch Height Control

Plasma Gantry

Laser cross hairs aid in the positioning of the cutting head

Plasma Gantry Linear Guide Ways

Swift-Cut CNC Plasma Cutting Table

- Water tray for efficient control of sparks and fumes
- Removable stainless steel splash guards for side rail protection
- Dropped rails for ease of loading full sheets
- Gantry parking to allow full sheet to be loaded overhead
- Heavy duty steel construction with durable paint finish
- Linear guideways for fast accurate motion
- High speed axis motors with closed loop feedback (encoder) for accuracy and reliability
- Dual drive Y-axis
- Rack and pinion drive system
- Breakaway head eliminates damage to torch and improves safety
- Laser guide for easy sheet positioning
- Cut metal up to 25mm thick depending on the Hypertherm Powermax unit selected
- Soft sense Digital Torch-Height Control (DTHC) Quick response for improved cut quantity and improved torch consumable life. This unique touch sensing is so soft and accurate even the thinnest sheet metal will not deflect while sensing.
- Dynamic Cut Control (DCC) is available on all Hypertherm Powermax models, This feature enables Software control of cutting amps and air pressure, Error messages, air pressures and critical data from the plasma unit is displayed on Swiftcut control screen for operator convenience, On the fly arc voltage, air pressure and cutting speed control ensures the highest quality cut at all times. INDUSTRY 1st UNIQUE TO SWIFT-CUT

CE Certified

Swift-Cut

AUTOMATION

Three Machine Sizes & Multiple Plasma Power Sources

- 1250 x 1250mm
- 2500 x 1250mm
- 3000 x 1500mm

We can match a machine to your production requirements

Machine Upgrades

Swift-Marker Unit (P9062)

Swift-Marker unit – integrated pneumatic marker. Can be used to automatically mark text, fold lines & centre marks on components prior to profiling to avoid costly second operations. Great for part numbering or serial numbering of parts.

Swift-Marker Optional Extra (P9062)

Swift-Cut Plasma Table Kits

Kits includes Swift-Cut Table and Plasma System

Model Swift-Cut 1250WT

Cutting Area mm	Hypertherm Model	Order Code
1250 x 1250	45XP	P9010
	65	P9011
	85	P9012
	105	P9013
	125	P9014

Model Swift-Cut 2500WT

Cutting Area mm	Hypertherm Model	Order Code
2500 x 1250	45XP	P9020
	65	P9021
	85	P9022
	105	P9023
	125	P9024

Model Swift-Cut 3000WT

Cutting Area mm	Hypertherm Model	Order Code
3000 x 1500	45XP	P9030
	65	P9031
	85	P9032
	105	P9033
	125	P9034

Note: Down draft tables are available POA.

Plasma Power Source

Hypertherm's Powermax market leading range of air plasma cutting systems enable you to cut any electrically conductive metal up to a thickness of 25mm, depending on the unit selected.

Choose from their Powermax range
45/65/85/105/125

System	Current Output	Cuts up to (Mild Steel)	Duty Cycle (Typical)
Powermax 45	20-45A	12mm	50% @ 45A 60% @ 41A 100% @ 32A
Powermax 65	20-65A	16mm	50% @ 65A 100% @ 46A
Powermax 85	25-85A	20mm	60% @ 85A 100% @ 66A
Powermax 105	30-105A	22mm	80% @ 105A 100% @ 94A
Powermax 125	30-125A	25mm	100% @ 125A

Hypertherm®
Cut with confidence®

Made in USA

SwiftCAM software is the most advanced software available in its class, with built in automation of many functions & settings ensures that anyone with a basic knowledge of computers will be capable of operating the CNC plasma cutting system. Minimal training requirements means the table will be operational almost immediately, maximising output from the start.

The Standard software supplied with every Swiftcut PRO series table boasts features such as automated control of the plasma cut settings as well as real-time feedback on the CNC of air pressure, amps and arc voltage monitoring, In fact the SwiftCAM software is so intuitive it automatically senses the arc voltage based on real-time feedback and applies this to the digital torch height system for the highest quality cutting results on any material.

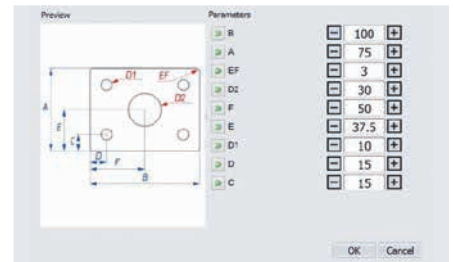

The Hypertherm Plasma is 100% controlled by the CNC so there is no need to make any manual settings.

SwiftCAM as standard has a library of over 80 parametric shapes, all you have to do is adjust the sizes and cut the part, great for quickly processing flanges, baseplates, brackets etc.. If your looking to cut more advanced shapes the advanced drawing importer assists you to import your drawing and automatically analyses & cleans up any drawing errors, this can then be saved as a clean drawing in the parts library.

Sheet setup is easy with the laser assist system coupled with the sheet rotation function saving any manual shifting or alignment of the sheet. Do you require multiple setups? We have that covered as well with the multiple user assigned reference points allowing you to have several pre-set setup datums.

SwiftCAM Software - Advanced

Are you planning to cut a large array of different parts in 1 sheet? If so the SwiftCAM advanced upgrade has the features to automate this for you, import multiple drawings simultaneously and then automatically nest these drawings using the advanced Automatic Part in Part nesting feature. This will give you the best sheet utilisation and automation of nesting saving you valuable material and time.

Large Library of Parametric Shapes

SwiftCAM Software

Order Code	P9055 Standard	P9056 Advanced
